## CLEANING SCREEN

### CLEANING SCREEN WITH MOBILE BLADE

The cleaning screen with the mobile blade is a machine specifically designed to screen particularly thick sewage, or sewage with suspended particles that could obstruct the filtering drum of a conventional cleaning screen.

The particular movement of the scraping blade, tangent to the filtering drum and the high-pressure interior washing, continuously clean the machine and therefore improve its performance. It can be used in many different fields, such as food, fruit and vegetable processing and meat and fish processing industries as well as slaughterhouses. It can also be used in other sectors such as tanneries, paper mills and wine industries.

#### Technical characteristics

Model	Drum length mm	Power kW
Micaf 40	400	0.55
Micaf 60	600	0.55
Micaf 90	900	0.55
Micaf 120	1200	0.55
Micaf 180	1800	0.55
Micaf 300	3000	1.1

#### Capacities (m<sup>3</sup>/h-OPENING)

- indicative values refer to sewage with suspended solids equal to 200ppm in volume -

Drum opening	0.25	0.5	0.75	1	1.2	1.5	2	2.5
Micaf 40	30	50	70	84	95	110	118	120
Micaf 60	60	105	140	175	195	218	235	240
Micaf 90	90	153	212	258	295	333	358	360
Micaf 120	118	208	278	345	387	436	468	470
Micaf 180	183	280	425	514	587	664	712	720
Micaf 300	420	720	1000	1200	1400	1600	1900	2100
